

The gallery roughly measures 1200 square feet. In addition to the walls, we have numerous pedestals of a variety of sizes and a small number of acrylic vitrines/dust covers to top the pedestals. At this point, we do not have a lot of flexibility to hang work on the adobe walls.

The "L"-shaped walls are on 4" posts. Each wall begins $29\frac{1}{2}$ " from floor, making the total height of the wall $77\frac{1}{4}$ " from the floor. Available height to hang work is 48".
